Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Drawings

The amended drawings filed on 12/20/2005 are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “base subassembly” (lines 2-3 of claim 1), “support assembly” (line 4 of claim 1) and “cover portion” (line 6 of claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The amended drawings filed on 12/20/2005 are objected to since elements 14, 57, 59, 72 and 81 are shown with metal cross-hatching rather than the disclosed elastomeric. Furthermore, it is unclear whether element 13T in figure 5 is meant to be shown in cross-sectional view or hidden view.

The amended drawings filed on 12/20/2005 are objected to since they include a figure without an accompanying figure number (i.e., the figure depicting elements 23S and 23).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the

Art Unit: 3679

renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Response to Arguments

Applicant's arguments with regard to the drawing objections have been fully considered but they are not persuasive.

The applicant argues that the "base subassembly" (lines 2-3 of claim 1), "support assembly" (line 4 of claim 1) and "cover portion" (line 6 of claim 1) would be familiar to one skilled in the art such that they do not need to be identified in the drawings by reference character. This is not persuasive. The drawings must show every feature of the invention specified in the claims. See 37 CFR 1.83(a). If, as the applicant argues, the claimed elements are present in the drawings the applicant's specification must identify them by reference character. Note that the applicant's amendment to the specification (page 12) stating "The bias spring 85 and bias plunger 86 are located inside ball 91a and **comprise** the base subassembly of the mounting assembly" (emphasis added) fails to clearly identify the base subassembly or mounting assembly by reference character. Are elements 85 and 86 the base subassembly and mounting assembly, respectively? Are the base subassembly and mounting assembly only certain portions of elements 85 and 86 and if so, which portions? The specification must provide clear antecedent basis for the claims by stating what drawing elements completely and precisely

Art Unit: 3679

correspond to the claimed features, rather than merely stating what elements **comprise** or include claimed features.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
